EXPERIENCE

General Assembly, Remote/ATL — *Instructional Associate*

July 2020 - Present

Software Engineering Immersive: Foster a collaborative, community-minded learning environment, communicate with students around course progress, deliver lesson content to a classroom of ~30 students

Web Development Tutor — *Self-employed*

September 2018 - Present

Taught students best JavaScript practices and advanced ReactJS concepts to build clean and elegant user interfaces and how to use troubleshooting tools and techniques to effectively locate and fix bugs in their applications

EDUCATION

General Assembly, Providence RI — *Certificate*

May 2018 - August 2018

Web Development Immersive: 12 weeks, 420 in-class hours, web development program in which I developed 4 full stack applications with jQuery, Ruby on Rails, Stripe, Node.js, and more

Community College of RI, Warwick RI — *Associates*

Jan 2017 - Present

Business Administration: 3.55 GPA with a focus on Accounting

PROJECTS

[Stay Fresh](#) — *MERN Stack web app with Redux*

An organizational tool designed to help users reduce waste and increase savings by monitoring the shelf life of the items in their kitchen. Uses OAuth2, node-cron, and SendGrid. Hosted on Heroku

[Timbrealla!](#) — *React app with Firebase*

Users write stories and edit others. All stories are editable and there is no authentication. Watch stories evolve as users expand on each others' ideas. Built with React using hooks.

Technical Skills

JavaScript | React | Redux | npm
HTML5 | CSS3 | Node.js | MongoDB
Ruby on Rails | SQL | Git | Heroku
AWS | Firebase | Cron | OAuth(2)
Webpack | Express.js | SCSS | yarn

Fixed Skills

Communication | Self-starting
Teamwork | Problem solving
Adaptability | Empathy | Curiosity

Aside

I spent the last few years contributing to my household as a homemaker. This gave me the opportunity to pursue numerous academic subjects. I've studied economics, music, accounting, history, and even dog training, but studying web development changed my life. I love the challenges and puzzles that come with each new project. I love the absolute need to always be learning, and I can't imagine doing anything else.
